SOFTWARE • DATA/GIS • INTERACTIVE MEDIA • ANIMAL & ENVIRONMENTAL OPERATIONS

## PROFESSIONAL SUMMARY

Computer science student and multimedia game-design graduate with 10+ years of independent project experience spanning software and web development, interactive systems, QA/testing, project leadership, data visualization, animal care, and zoo nutrition. Experienced coordinating multidisciplinary teams, maintaining technical documentation, organizing operational records, and translating complex requirements into reliable workflows. Long-term interests include scientific programming, research software engineering, GIS, computational ecology, ecological modeling, and technology supporting animal care and conservation.

## EDUCATION

|                                                                                                                                                                                                                                                                                            |                 |

- Translate creative and functional requirements between contributors; track progress, assign tasks, integrate assets, and maintain structured design, dialogue, implementation, and production documentation.
- Create and maintain project websites, portfolio materials, publisher-facing documentation, visual assets, and project files while working toward a vertical slice for external presentation.
- Contribute across programming, 2D/3D art, system design, level design, writing, QA, production, and technical project management.

**Owner, Animal Care & Operations** | *Discoid Roaches Tampa* | *Gibsonton, FL*

**Apr 2024-Present**

- Operate a small-scale feeder-insect supply serving local reptile owners and a retail pet store; manage customer communication, scheduling, order tracking, inventory, and fulfillment.
- Breed and maintain insect colonies through feeding, habitat management, sanitation, environmental control, population monitoring, and organized care routines.
- Track colony populations, feeding schedules, inventory, client orders, and bulk fulfillment of up to several thousand insects using dependable logs and structured workflows.
- Maintain reptiles and amphibians, including an Argentine black and white tegu, Ackie monitor, and Pacman frog, using species-appropriate heating, UVB, humidity, feeding, enclosure, and sanitation systems.
- Monitor animal condition and behavior, adjust care routines as needed, and follow applicable Florida wildlife and enclosure requirements for regulated species.
- Provide routine care for household animals, including feeding, cleaning, habitat maintenance, and general health observation.

## ADDITIONAL EXPERIENCE

**Global Career Accelerator Participant** | *The Global Career Accelerator* | *Remote*

**Completed May 2026**

- Completed applied training in web development, AI-powered JavaScript, AI professional skills, and intercultural collaboration.
- Built experience using JavaScript, web tools, AI-assisted workflows, project collaboration, and professional communication in a structured career-readiness program.

**Part-Time Handyman Assistant** | *Hatfield Handyman* | *Gibsonton, FL*

**Feb 2020-Present**

- Assist with carpentry, painting, yard work, power washing, general home repairs, job-site preparation, and cleanup.
- Perform physically demanding indoor and outdoor work, including lifting and equipment handling, while maintaining quality and safety.
- Coordinate tasks with team members, meet deadlines, and support customer expectations across changing project requirements.

**Food Service Worker** | *Publix* | *Lithia, FL*

**Jul 2022-Sep 2022**

- Assisted kitchen staff with food preparation, maintained clean work areas, and followed food-safety and sanitation standards.
- Supported team operations and changing priorities in a fast-paced food-service environment.

**Cook / Cashier / Food Service** | *Greatest Little Pizza Place* | *RAF Lakenheath, UK*

**Aug 2018-Dec 2019**

- Prepared pizzas and other menu items, operated the register, and maintained food-safety standards and clean preparation areas.
- Supported team members during busy service periods to keep orders moving and serve customers efficiently.

## SELECTED PROJECTS

**Florida Invasive Reptile GIS Dashboard** | *QGIS, Power BI/Excel, Python, GitHub*

**In Progress**

- Clean and standardize public occurrence records for invasive and nonnative reptile species reported across Florida.
- Build species- and county-level maps and a simple dashboard to analyze distributions, location patterns, and reporting trends.
- Document data sources, transformation steps, methods, limitations, findings, screenshots, and reproducible project materials in a GitHub README.

**Kid Hop-o: Rising Star** | *Godot* | *Game design, production, systems, art direction*

**Ongoing**

- Develop a large-scale story-driven independent game while coordinating a multidisciplinary team toward a playable vertical slice.
- Maintain extensive design documentation and implement or supervise gameplay, UI, art, narrative, testing, and production systems.

**Game Jam Projects** | *IGMC / Dragon Jam*

**2015-2017**

- Producer, Planarian's Tale 2 (IGMC 2017); artist, Space Fish (Dragon Jam 2017); producer, Planarian's Tale (IGMC 2015).
